RE: Academy of Richmond County
Lightweight Stone

Dear Brundy:

I would like to thank you and the Piazza Stone Team for contributing to the success of the Academy of Richmond County project. Your team's technical expertise was apparent from the planning process through installation.

Your lightweight stone product resolved a need for a building material that could blend seamlessly with full-depth cast stone while not requiring costly increases to the structure of the building. The combination of aesthetics, cost efficiency, and design flexibility allowed us to create a building that complimented its historical inspiration. Cornices, parapet caps and corbels were manufactured with impeccable detail and quality control.

For all these reasons, I will not hesitate to design around Piazza Stone for future project. I look forward to working with you and your Team again.

Sincerely,

A handwritten signature in dark ink, appearing to read "Nicholas Dickinson, II". The signature is fluid and cursive, with a prominent "N" and "D".
