To Whom It May Concern:

RE: Piazza Stone Finish

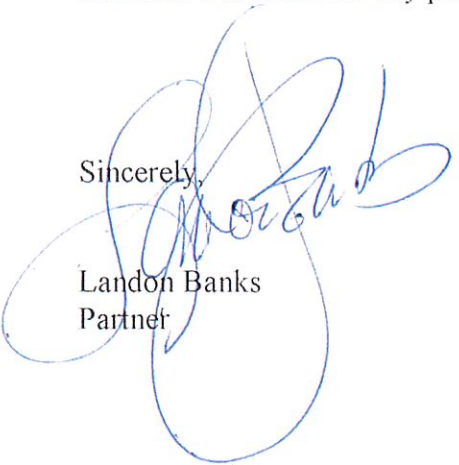

Landon Banks Enterprises, LLC is near completion of a two story \$3 million residence in the Fort Worth, Texas area which had originally called for carved Syrian stone.

Piazza Stone was submitted as an affordable & available alternate to the Syrian stone and the owners chose it not only for the affordability, but also for the quality, appearance and availability.

The final result of the Piazza Stone has given the owners a very appealing exterior finish, kept within budget and was received in a timely manner.

The owner and staff at Piazza Stone Company were pleasant to work with and made every effort to see that our order was completed and delivered in a timely manner. We would recommend Piazza Stone Products to anyone looking for an excellent alternative to stone for any project.

Sincerely,

Landon Banks  
Partner
